## Weatherization Services

Work on your home will take place on days and times that are best for you. GBCA employs our own crews, so your work will be performed by qualified professionals you can trust.\*

### Safety

Our program does more than help you save on your energy bills. We also perform safety tests on appliances, smoke detectors, carbon monoxide detectors, and heating systems to make sure they are safe for you and your family.

## Overview

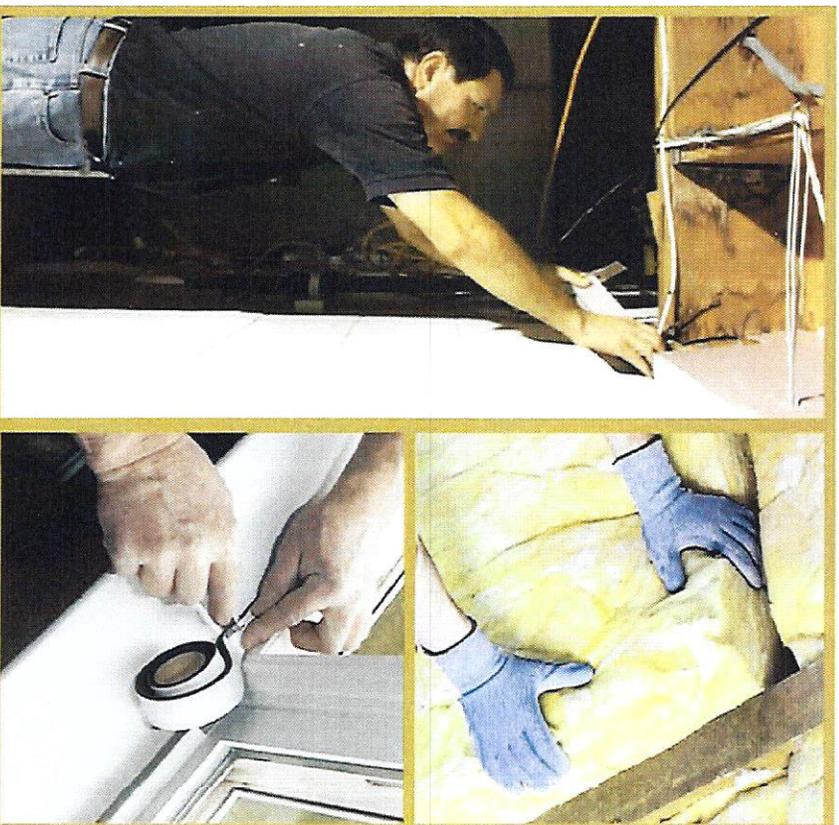

Greater Bergen's Weatherization Service is part of a U.S. Department of Energy program that assists qualified low-income homeowners and tenants to improve the energy efficiency of their homes. There is no charge for these services.

GBCA's Weatherization Program has helped more than 3,300 Bergen County residents since 2009.

### GETTING STARTED IS EASIER THAN YOU THINK!

## How Our Program Works

1. Call our office at 973-546-1441 and request an application.
2. Mail or bring in your completed application. If you qualify, one of our building analysts will set up a free home energy audit with you.
3. After your home energy audit is completed, our scheduler will call to set up an appointment to complete the work.

\*Work on heating systems is performed by licensed independent contractors.
