The **Junior Chemical Engineering** program introduces our youngest engineers to fundamental concepts of solids, liquids, and solutions. Students investigate the properties of several crazy concoctions and make their own samples of bubbles, play dough, flub, and more.

During our **Electrical Engineering** program, students use the Engineering Design Process to design, create, test, and refine basic electronics and circuits. Students experiment with Snap Circuits® to discover the capabilities of major electronic components. In addition, students build their own flashlights and explore the world of magnetic energy by building their own Magnetic Levitation vehicle.

REGISTER NOW!

1. Register online at <https://tinyurl.com/y87hxjmo>
2. In person at the Rec Office located inside the Garfield Recreation Center, 466 Midland Avenue.
M—F 8:00 a.m.—4:30 p.m.
